

Lingerie is the final barrier to the fully nude body, and is thus inherently erotic. Yet the design of lingerie enhances its allure: it strategically reveals, conceals, and highlights the wearer's form. As French lingerie designer Chantal Thomass observed, "The essence and attitude of lingerie is all in suggestion."

*Exposed: A History of Lingerie* traces developments in intimate apparel from the eighteenth century to the present. There are two types of lingerie, hard and soft. Hard lingerie includes corsets, bustles, and structured bras, while soft lingerie consists of unstructured garments, such as slips, nightgowns, and panties. *Exposed* begins with a sky blue corset and ends with a sapphire blue bra and panty set from luxury label La Perla.

As the relationship between dress and the body has been redefined over time, so too have the function and appearance of lingerie. During the eighteenth century, some decorative corsets and petticoats were worn as part of a woman's dress. Many modestly designed nineteenth-century undergarments were viewed strictly within intimate settings. Yet in 1898, a "mania" for elaborate, colorful, and seductive lingerie led French journalist Octave Uzanne to lament that "the last remains of feminine modesty sunk out of sight." From the modern, streamlined "camiknickers" of the 1920s, to Dior's voluminous petticoats of the 1950s, to today's overtly erotic styles by Agent Provocateur, lingerie remains a topic of enduring fascination.
